

I have to say it's been amazing...

The pupils are the funniest bunch of people that I have ever met and I've had such an awesome time with them.

Overall the week was a complete success and the whole experience was such an eye-opener for the pupils. The activities that we did weren't just educational for them, but also for me and the other students. I even got to learn some Japanese which I've never had the chance to do before.

I would highly recommend college or university to anyone who wanted to go because it really is a fantastic experience. Some of the best things are meeting lots of great people and trying new things, just like our pupils do on L02S!
